

1. Console "Hello Word" in document.ready function

Source Code

```
<script>
  $("document").ready(function() {
    console.log('Hello World!!');
  })
</script>
```

Output Screenshot

2. Select a ID name "#test" and add class "load" when DOM is loaded

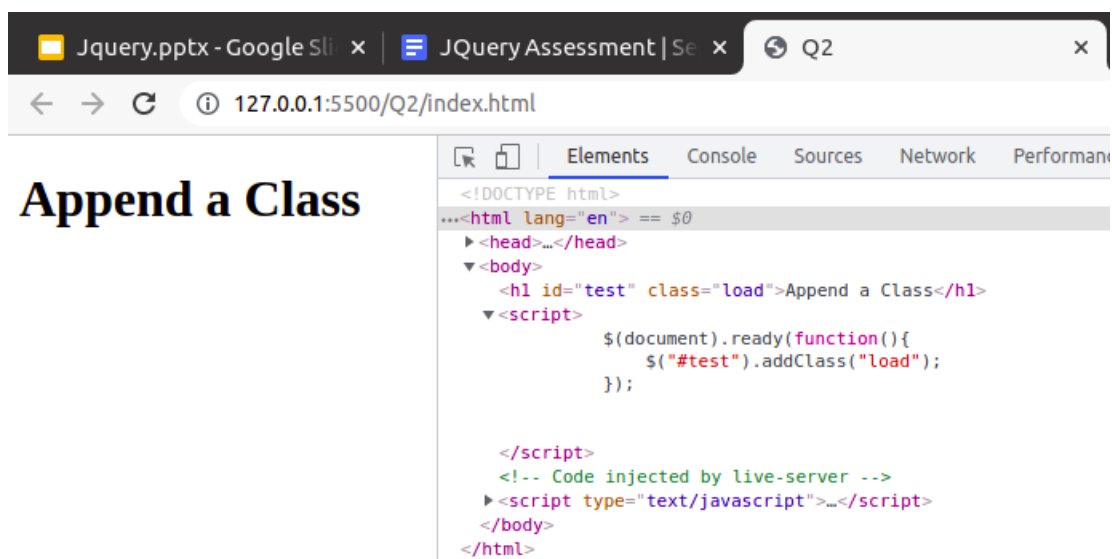

Source Code(HTML)

```
<h1 id="test">Append a Class</h1>
```

Source Code(JQuery)

```
$(document).ready(function(){  
    $("#test").addClass("load");  
});
```

Output Screenshot

3. Change the color of element which class name end with "-new"

Source Code(HTML)

```
<h1 class="color-new">Welcome to TTN!</h1>
```

Source Code(JQuery)

```
$( 'document' ).ready(function(){  
    $( '[class$=-new]' ).css( 'color', 'red' );  
});
```

Output Screenshot

Welcome to TTN!

4. Disable submit button using jquery attr method

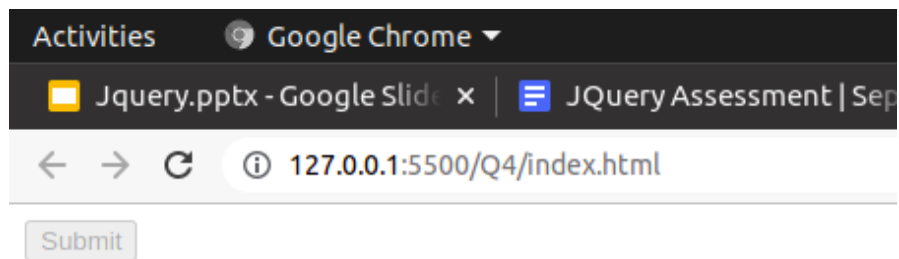

Source Code

```
<button type="submit" id="disable">Submit</button>
```

Source Code(JQuery)

```
$( 'document' ).ready(function(){  
    $('#disable').attr('disabled', true);  
});
```

Output Screenshot

5. Change the font size of ".target" which has parent element with id name "#main"

Source Code

```
<div id="main">  
  <p class="target">Something happen!</p>  
</div>
```

Source Code(JQuery)

```
$( 'document' ).ready(function(){  
  $( '#main > .target' ).css('font-size','500%');  
});
```

Output Screenshot

Something happen!

6. After page load change the HTML of div element with "p" element

Source Code

```
<div>
  <h1>This code is inside div Element</h1>
</div>

<p>This code is inside p Element</p>
```

Source Code(JQuery)

```
$( 'document' ).ready(function(){
    $( 'div' ).html( $( 'p' ).html() );
});
```

Output Screenshot Before

This code is inside div Element

This code is inside p Element

Output Screenshot After

This code is inside p Element

This code is inside p Element

7. Bind a click function to an "click" element and append next "click" next to it.

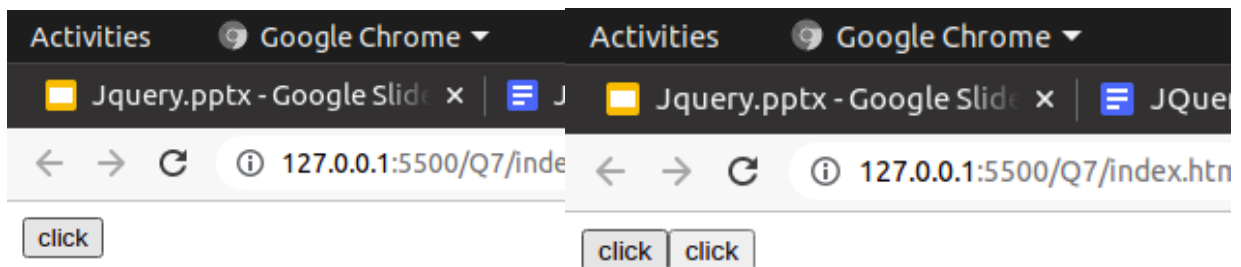

Source Code(HTML)

```
<input type="submit" id="submitBtn" value="click">
```

Source Code(JQuery)

```
var a = $("<input>", {  
  type: "submit",  
  value: 'click',  
  id: "click_next"  
});  
  
$('document').ready(function(){  
  $('#submitBtn').bind("click", function() {  
    a.insertAfter($('#submitBtn'));  
  })  
});
```

Output Screenshot

8. Click event not working on element which added dynamically or via script, make it work using .on method

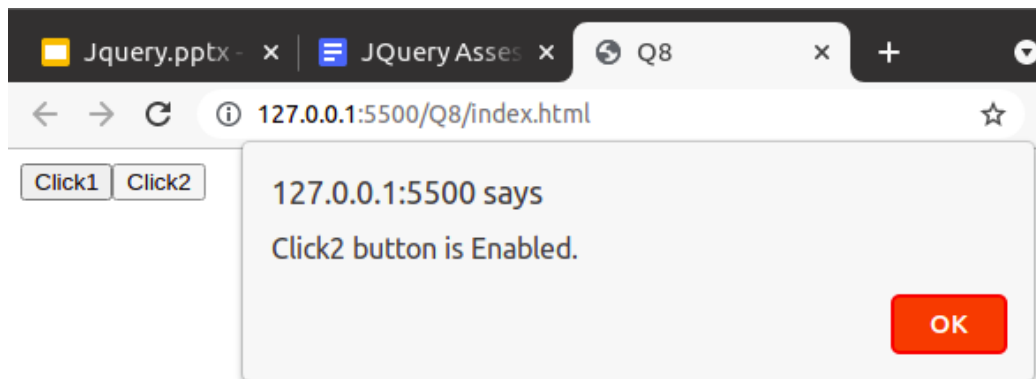

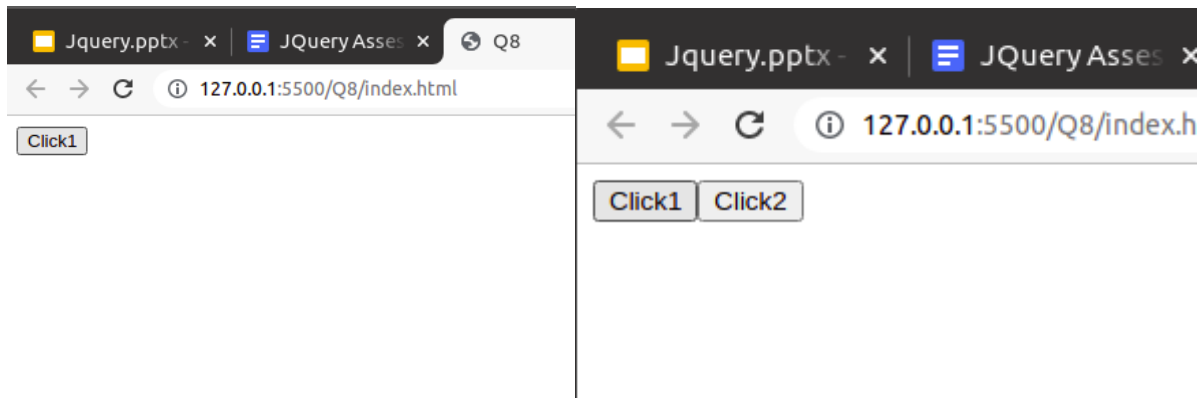

Source Code

```
<div class="center">
  <input type="submit" value="Click1" id="submitbtn">
</div>
```

Source code(JQuery)

```
$('#document').ready(function(){
  var e1 = $('<input>', {
    type: 'submit',
    value: 'Click2',
    class: 'click_next'
  }).on('click', function(){
    console.log('hello');
    alert('Click2 button is Enabled.');
```

Output Screenshot

9. Get dropdown selected value on onchange event and append in div container

Source Code(HTML)

```
<p>Select your competency</p>
<select id="onchange">
  <option value="reactnative">ReactNative</option>
  <option value="qe">QE</option>
  <option value="mean">Mean</option>
  <option value="jvm">JVM</option>
  <option value="python">Python</option>
</select>
<div id="changed">hello</div>
```

Source Code(JQuery)

```
$( 'document' ).ready(function(){
    $( 'select' ).on( 'change', function(e){
        $( '#changed' ).text( $( 'selected', '#onchange' ).val());
    });
});
```

Output Screenshot

10. Create a dropdown menu using hover method in jquery

Source Code(HTML)

```
<div id="container">
  <ul id="nav">
    <li>
      <a href="#">Select your plan</a>
      <ul>
        <li><a href="#">1gb</a></li>
        <li><a href="#">10gb</a></li>
        <li><a href="#">500gb</a></li>
        <li><a href="#">1tb</a></li>
      </ul>
    </li>
  </ul>
</div>
```

Source Code(CSS)

```

ul,li,a {
    padding: 0px;
    margin: 0px;
}
#nav a {
    color: #fff;
    list-style: none;
}
div ul li ul {
    background-color: #4a5b78;
    list-style: none
}
#nav > li > a {
    background-color: #343434;
    padding: 16px 18px;
    text-decoration: none;
    display: block;
    border-bottom: 2px solid #212121;
    background: linear-gradient(top, #343434, #111111);
}
#nav li ul li a {
    padding: 10px 0;
    padding-left: 30px;
    text-decoration: none;
    display: block;
}
div {
    width: 280px;
}
#nav li ul {
    display: none;
}

```

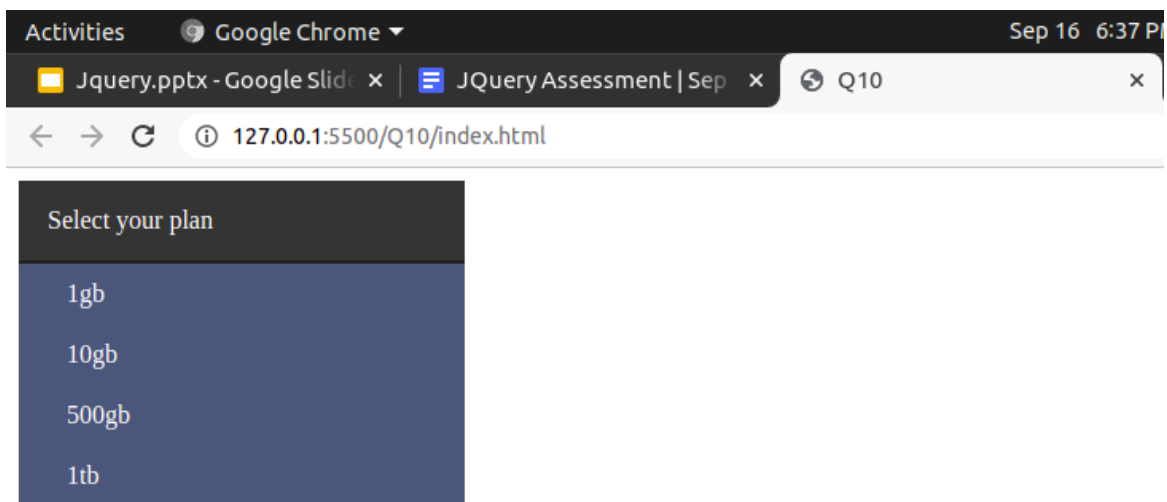

Source Code(JQuery)

```

$(document).ready(function() {
    $("#nav li").hover(
        function() {
            $(this).find('ul').slideDown();
        },
        function() {
            $(this).find('ul').slideUp();
        }
    );
});

```

Output Screenshot

11. On clicking on "google" tag. It is taking us to google home page. Stop it from happening.

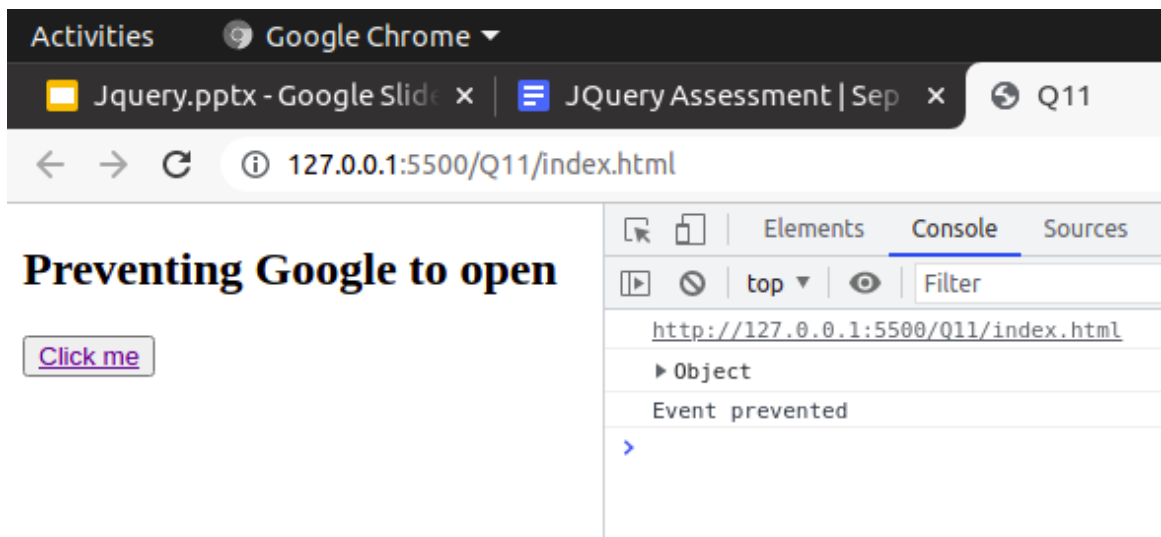

Source code(HTML)

```
<h2>Preventing Google to open</h2>
<button><a href="https://www.google.com/">Click me</a></button>
```

Source Code(JQuery)

```
$( 'document' ).ready(function(){
    $('a').click(function(e){
        e.preventDefault();
        console.log("Event prevented")
    })
});
```

Output Screenshot

12. We have bind a click funtion to parent div but we want stop it from performing when user clicks on its child li

Source Code(HTML)

```
<div class="panel">
  <ul>
    <li> list inside div</li>
    <li> list inside div</li>
    <li> list inside div</li>
  </ul>
</div>
```

Source Code(CSS)

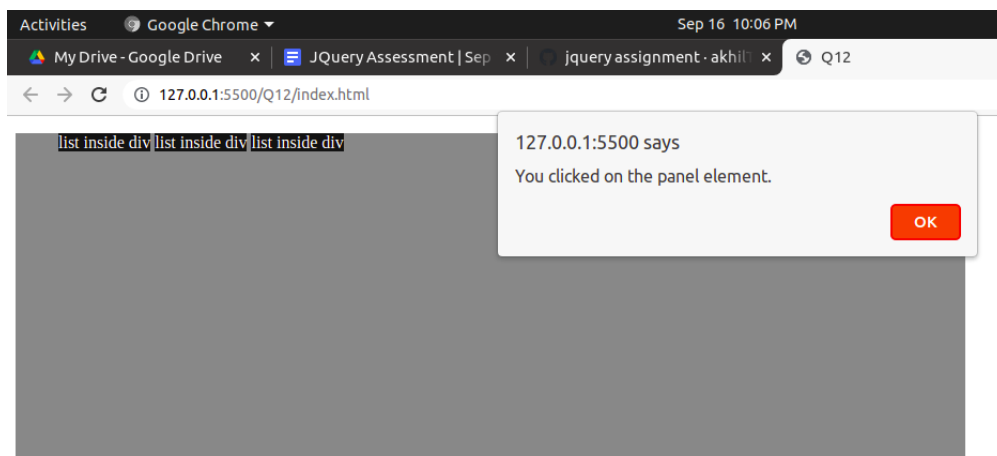

```
html,body{height:100%;width:100%}
html, body {
  height : 100%;
}
.panel {
  width : 80%;
  height : 80%;
  background : #888;
}
div ul li {
  list-style:none;
  display: inline;
  cursor: pointer;
  background-color: #121212;
  color: #fff;
}
```

Source Code(JQuery)

```

<script>
$(document).ready(function(){
    $('.panel').on('click', function () {
        alert('You clicked on the panel element.');
```

Output Screenshot

13. Get the max height of elements using jquery each method

Source Code(HTML)

```
<div class="myElement">  
Click the button to calculate the height of Div</div><br>  
  
<button>Display the height</button>
```

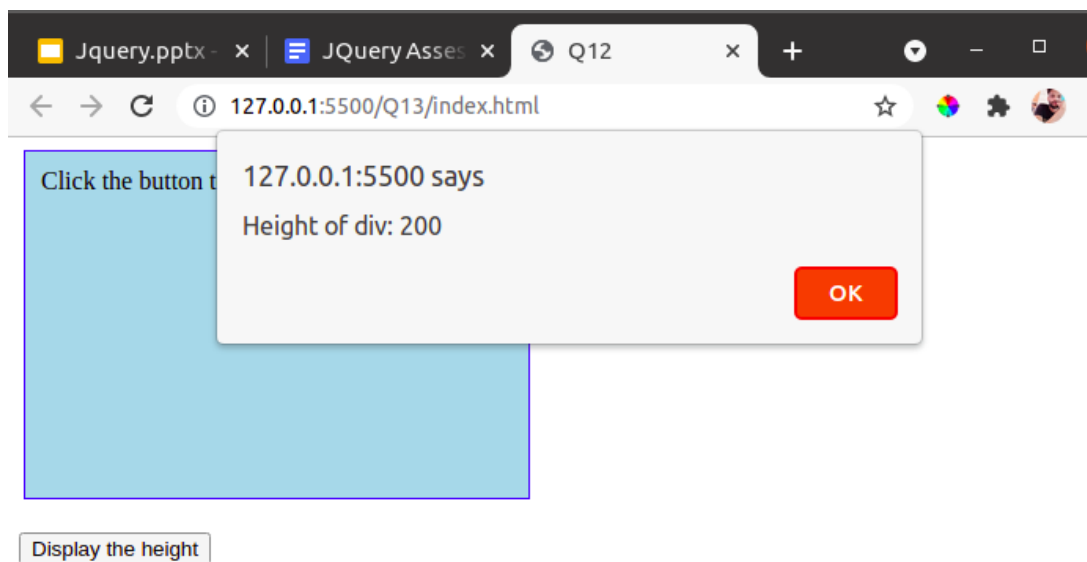

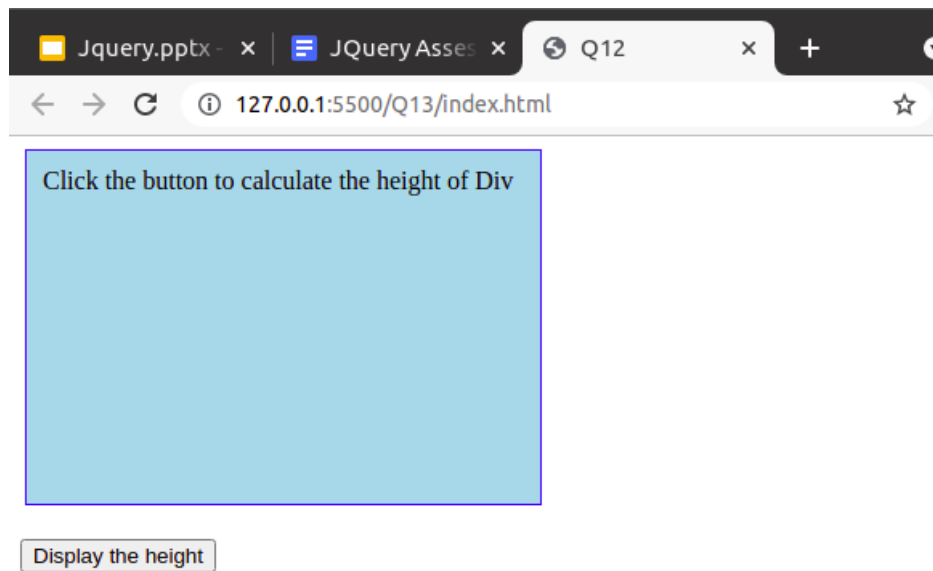

Source Code(CSS)

```
.myElement{  
    height:200px;  
    width:300px;  
    padding:10px;  
    margin:3px;  
    border:1px solid blue;  
    background-color:lightblue;  
}
```

Source Code(JQuery)

```
$(document).ready(function(){  
    $("button").click(function(){  
        alert("Height of div: " + $("div").height());  
    });  
});
```

Output Screenshot

14. Chagne color of every cell which has numberl larger than 10.

Source Code

```
<table>
  <tr>
    <th>Name</th>
    <th>Experience</th>
  </tr>

  <tr>
    <td>Amit</td>
    <td class="findNum">2</td>
  </tr>

  <tr>
    <td>Akash</td>
    <td class="findNum">12</td>
  </tr>

  <tr>
    <td>Anuj</td>
    <td class="findNum">8</td>
  </tr>

  <tr>
    <td>Permil</td>
    <td class="findNum">15</td>
  </tr>

  <tr>
    <td>Vipul</td>
    <td class="findNum">4</td>
  </tr>
</table>
```

Source Code(JQuery)

```
$('#document').ready(function(){  
  $('.findNum').each(function(){  
    if($(this).text() > 10)  
      $(this).css('background-color', 'blue');  
  });  
});
```

Output Screenshot

15. Retrive the data from server using ajax get call

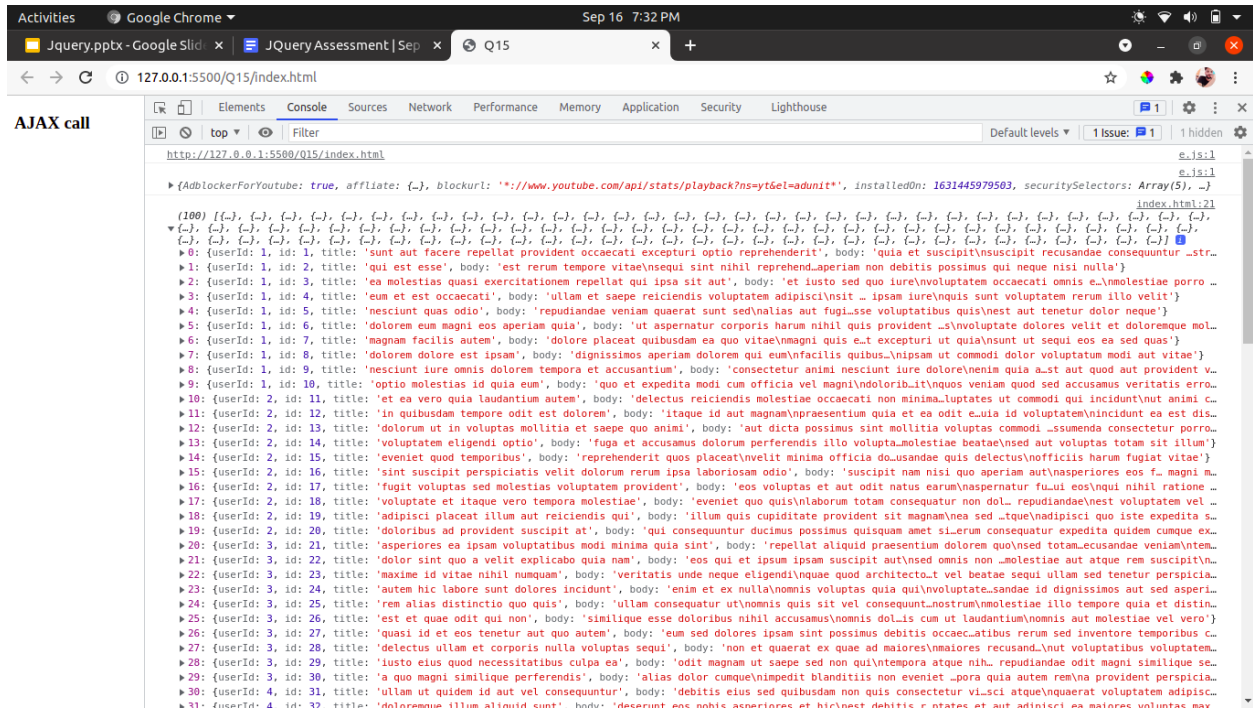

Source Code(HTML)

```
<h3>AJAX call</h3>
<p id="ajax"></p>
```

Source Code(JQuery)

```
$( 'document' ).ready(function(){
$.ajax({
  type: 'GET',
  url:"https://jsonplaceholder.typicode.com/posts",
  success:function(data) {
    alert("get success");
    console.log(data);
  }
});
});
```

Output Screenshot

16. Add cross button on row and bind click function which make a delete request to server, after success event remove the row from dom

Source Code(HTML)

```
<table id="table">
  <tr>
    <th>Marks</th>
    <th>Name</th>
  </tr>
  <tr>
    <td>11</td>
    <td>Amit</td>
  </tr>
  <tr>
    <td>10</td>
    <td>Permil</td>
  </tr>
  <tr>
    <td>9</td>
    <td>Mandeep</td>
  </tr>
  <tr>
    <td>14</td>
    <td>Vipul</td>
  </tr>
  <tr>
    <td>8</td>
    <td>Akash</td>
  </tr>
  <tr>
    <td>15</td>
    <td>Neha</td>
  </tr>
</table>
<button>CROSS</button>
```

Source Code(CSS)

```

table, td, th {
    border: 1px solid black;
}
th, td {
    padding: 2px;
}

```

Source Code(JQuery)

```

function del() {
    var row = document.getElementById("table");
    row.deleteRow(0);
}
$(document).ready(function() {
    $("#button").click(function() {
        $.ajax({
            url: "https://jsonplaceholder.typicode.com/posts/1",
            dataType: "json",
            type: "DELETE",
            success: function(result) {
                del();
            }
        });
    });
});

```

/ create a slide show to animate images of delay of

Source Code(HTML)

```
<h1>Slider</h1>
<div class="center">
  
</div>
```

Source Code(JQuery)

```
$( 'document' ).ready(function(){
  let image_arr=['img1.jpg','img2.jpg','img3.jpg','img4.jpg'];
  let index=0;
  setInterval(function(){
    if(index>2)
      index=0;
    else
      index++;
    console.log(index);
    $('img').attr('src',image_arr[index]);},500);
});
```

Output Screenshot
